Apex Technology Group Successfully Completes SOC 2 Audit

Apex is thrilled to announce we are now SOC 2 Type II Compliant.

This certification demonstrates our continued commitment to compliance and ensures our clients with the confidence that the required safeguards are in place to protect your data.

Established by the American Institute of Certified Public Accountants (AICPA), the SOC 2 framework defines a set of criteria based on five trust services principles: security, availability, processing integrity, confidentiality, and privacy. SOC 2 reports affirm a company's infrastructure, software, people, data, policies, procedures and operations have been reviewed to ensure data is securely collected, used, stored, and protected from unauthorized access.

As your trusted IT partner, Apex is dedicated to continuous improvement and evolving alongside the industry to better serve your needs. This achievement reinforced our longstanding commitment to managing your data and technology with the highest level of security and care.
